100-Plus

A self-contained, compact, horizontal or vertical laminar flow module.

The Envirco 100-Plus is an economical, multi-purpose, laminar flow module that is completely self-contained. It provides an ISO Class 5* (Class 100) environment within the work area that complies with the latest IEST Recommended Practices.

Horizontal or Vertical Airflow
Using an existing work surface, the unique design of the 100-Plus enables quick and easy assembly to either a horizontal or vertical laminar airflow configuration.

The positive pressure† laminar airflow provides product protection only. Air from within the cabinet is returned to the room through the front access opening.

Standard Features
• An ISO Class 5* environment utilizing an aerosol challenged high efficiency particulate air (HEPA) filter
• Easy conversion to either horizontal or vertical configurations
• Single electrical outlet, 115V, 15 Amp, flush mounted on the front blower housing
• A welded steel cabinet with a corrosion resistant polyurethane enamel finish
• Perforated aluminum diffuser screen protects the HEPA filter and maintains uniform airflow velocity within the work area
• Quiet operation (65 dBA ± 3 measured 30 in. (762 mm) from the filter face)
• Three clear, removable acrylic enclosures with a fixed view screen

Reverse Laminar Flow Option
The reverse or negative pressure laminar airflow 100-Plus (Part No. 10594) helps contain aerosols generated from within the work area.

*As defined by the latest ISO 14644 and IEST Recommended Practices, where particle count does not exceed 3520 particles, 0.5 µm or larger, per cubic meter of air.
†Note: Positive pressure laminar flow clean benches provide product protection only. Reverse or negative pressure laminar flow cabinets provide limited personnel and environmental protection from aerosols generated within the work area.
SPECIFICATIONS

Filters
Aluminum framed High Efficiency Particulate Air (HEPA) type, with a minimum efficiency of 99.99% at 0.3 micron, aerosol challenged (zero probed).

Prefilters
Washable type, polyurethane foam - 30% ASHRAE.

Airflow
90 feet per minute ±10 FPM (0.45 meter per second) average velocity measured 6 in. (152.4 mm) from the diffuser screen. Uniformity ±20% of average or better.

Motor/Blower Assembly
Direct drive, continuous duty 1/8 Hp, .09kW, with sealed-for-life bearings and inherent overload protection. Motor/blower assembly is electronically balanced (dynamically) and mounted on vibration dampening rubber mounts.

Motor/blower assembly is designed to provide rated airflow through a 50% increase in initial static pressure.

Speed Controller
Solid-state speed control with RFI suppression for adjusting airflow velocity.

Electrical
Standard 15 Amp, 115V, single phase, 60 Hz, rubber covered cord with 3-prong grounded plug.

Single electrical outlet flush mounted on front blower housing.

Optional fluorescent lighting fixture provides 150 foot-candles (1615 lux) at the work surface.

Construction
Welded metal cabinet with exterior finished in corrosion resistant polyurethane enamel.

Three removable 1/8 in. (3.18 mm) clear acrylic enclosure panels and fixed view screen.

Options
• 220V, 50hz Transformer
• Trace Metal Analysis Unit, Part No. 834911
• Fluorescent Light Fixture, Part No. 10615
• I.V. Rod, Part No. 10617
• Magnehelic Pressure Differential Gauge, Part No. 10693

Applications
• Critical Sample Preparation
• Hyperalimentation
• I.V. Admixtures
• Media Preparation
• Microscopy Analysis
• Pharmaceutical Preparation
• Syringe Filling
• Tissue Culture
• Microelectronic Assembly
• Optical Assembly
• Sterility Testing
• Reverse Flow Configuration for Particulate Containment

Warranty
Limited one year.
