

Filtra 2000 Absolute®

Advantages

- High filter surface area offers low pressure drop for energy savings and longer life
- Airflow capabilities up to 2400 cfm with low initial pressure drop

Description: High capacity HEPA/ULPA grade filter in an anodized aluminum enclosing frame with seamless poured-in-place sealing gasket

Typical applications: Built-up filter banks, rooftops, split systems, free-standing units, package systems and air handlers in medical facilities, pharmaceuticals, and clean process manufacturing.

Efficiency: 95% to 99.999% at 0.3µ to

Media: Microfine glass media formed into individual mini-pleat media packs and assembled into a V-bank filter configuration.

Recommended final pressure drop: Consult factory. Rule of thumb: change filter when the initial pressure drop doubles.

Temperature: Maximum continuous operating temperature of 175° F (79° C).

Ratings: Tested in accordance with IEST Recommended Practice for Testing HEPA Filters. UL 900.

See Literature 1823 for more details.

Model Number	Efficiency	Nominal Size (H x W x D, inches)	Airflow Capacity (cfm)	Resistance @ Airflow (inches w.g.)	Media Area (sq.ft.)	Shipping Weight (lbs.)
