

PRODUCT OVERVIEW

- Available in 1" and 2" depth
- Rugged galvanized construction lasts the lifetime of the system
- Ideal for use in
 - Office and Retail
 - Manufacturing and Distribution
 - Government and Education facilities
 - Hotels and Airports
 - Single and Multi-Family Housing

AEROSTAR® PAD HOLDING FRAMES

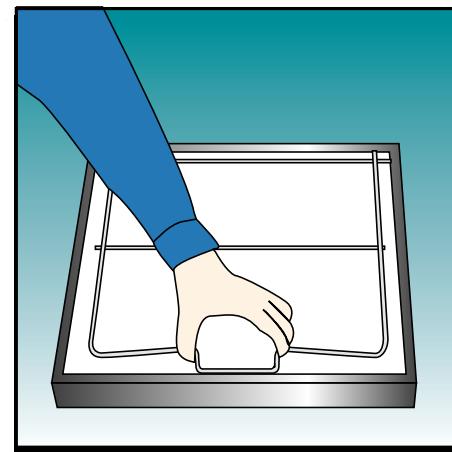

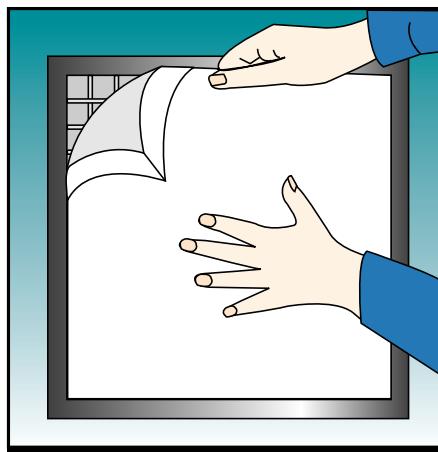

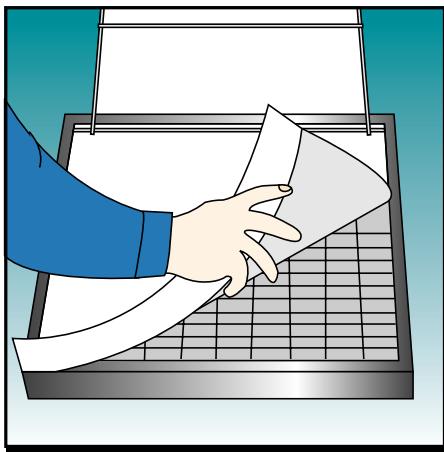

WHY THE PAD HOLDING FRAME?

- Reusable Frame for holding a variety of media types
 - Frame can be reused over and over for the entire lifetime of the system
 - Hinged gate makes change outs quick and easy
 - Can accommodate a variety of grades and types of fiberglass and synthetic media
 - Offers the ultimate in filtration flexibility by installing media to match the system application
- Durable construction for long service life
 - 26 gauge galvanized steel frame
 - Downstream backing is 16 gauge 1"x1"galvanized welded wire mesh
 - Mesh is spot welded to the frame for added support
 - 11 gauge galvanized steel gate provides optimal media support with minimal air flow restriction
 - Designed for velocities up to 500 fpm

PAD HOLDING FRAMES

INSTALLATION INSTRUCTIONS

* Based on a 24 x 24 filter @ 1200 cfm Changing air filter pads are a snap. Simply open the hinged gate, remove the dirty pad and install the clean replacement. The hinged gate design provides superior media support without restricting air flow.

ADVANTAGE OF THE PAD HOLDING FRAME

Design ensures safe installation and handling of filter frame. Once the low initial cost of the permanent frame is absorbed, the buyer purchases only the filter pads—the heart of any filter system—making the system extremely economical and cost effective. Frame design will accommodate all grades and types of fiberglass and synthetic medias.

SPECIFICATIONS

Filtration Group Pad Holding Frames are available in a variety of standard and custom sizes in three different thicknesses (1/2", 1", 2"). Pad and frame systems are designed to handle velocities up to 500 FPM.
