

NEW GENERATION X3 V-BELTS

Wrapped belts designed to be low maintenance, and extra durable for extended belt life. Cutting down maintenance and keeping your machines running at full capacity saves your time and your money.

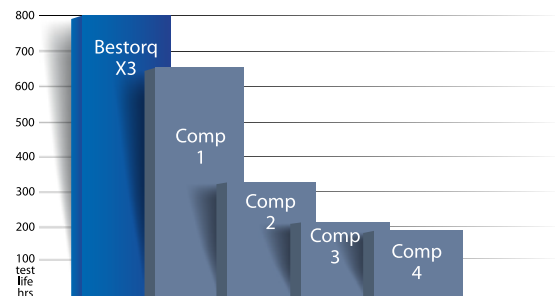

BELT DETAILS

- durable and designed to carry a high load capacity, resulting in fewer belts on a drive which saves space and cost while reducing axial and bearing loads
- X3 A/4L and B/5L belts are dual branded, featuring the flexibility of FHP 4L and 5L belts and high power capacity of A and B section belts
- matches to tighter tolerances than ARPM and ISO standards for confidence in running maximum loads
- meets all ARPM Belt Standards, heat and oil resistant, Static Conducting to ARPM, ISO1813 and Mine Safety Standards
- low maintenance means no rechecks or retensioning

BELT LIFE

Belt life of all major brands is shown below. Bestorq test data is based on B42 X3.

READY TO ORDER

X3 belts are amazingly uniform and run smooth. With excellent adhesion between components and low stretch tensile cords, they have very low elongation which do not require any rechecks or retensioning when installed at the correct recommended tension.

NOTE: X3 belts are made from new materials and new molds. They will only match with other Bestorq X3 belts. New X3 energy savings belts are ready to order in the following belt profiles: 3L, 4L, 5L, A, B, C, D, 3V, 5V, 8V, SPZ, SPA, SPB, SPC, AA, BB, CC, B-C-D banded, and 3V-5V-8V-SPB-SPC banded.
